TITLE : MIRROR STRUCTURE

ABSTRACT : PROBLEM TO BE SOLVED: To simply and speedily switch a mirror surface to a use state or a non-use state.

SOLUTION: In this mirror structure, the mirror surface 11 and a liquid crystal panel 20 are attached to a frame body 30 by overlapping them so that the panel 20 may be on a front surface side, and a display selection switching means for selectively switching the display of the panel 20 to a transparent state or an opaque state is provided. Then the mirror surface 11 is visible through the panel 20 in the transparent state at the time of using and the mirror surface 11 is made invisible by the panel 20 in the opaque state at the time of not using.
